

Remote Deposit Processing - Bank

Receive Images, Not Checks, From Depositors

Remote Deposit Management Program

- Manages transmission of deposit files from depositor to bank
- Stores TIFF files with images, data, and depositor ID of each deposit
- Creates permanent item number and index to all checks and deposit tickets for instant lookup
- Handles backup of all files onto CD, DVD, or another computer on the network
- Prints front and back and details of any item if needed
- Prints lists of deposits with status and totals by depositor
- Creates X9.37 Image Presentation files, Outclearings Bundle Listings, Proof Transfer Files, and Image Transfer Files.
